Senate Resolution No. 5441

BY: Senator HAMILTON

MEMORIALIZING Governor Andrew M. Cuomo to proclaim
May 2016, as Maternal Depression Awareness Month in
the State of New York

WHEREAS, It is the custom of this Legislative Body to help increase awareness of serious health conditions that affect the lives of citizens of New York State; and

WHEREAS, It is the sense of this Legislative Body to memorialize Governor Andrew M. Cuomo to proclaim May 2016, as Maternal Depression Awareness Month in the State of New York; and

WHEREAS, According to the New York State Department of Health and Office of Mental Health, there are four recognized types of maternal depression: prenatal depression, "baby blues," postpartum depression and postpartum psychosis; and

WHEREAS, Although all types have similar symptoms, the prevalence rates, some symptoms and time frame of the depressions differ; some studies also explore postpartum major depression, which is similar to major depression except after pregnancy; and

WHEREAS, For example, "baby blues" is the least severe, and usually lasts about two weeks maximum after delivery; it is the most common, and as many as 80 percent of new mothers suffer from "baby blues"; and

WHEREAS, Some symptoms include exhaustion, crying, sleep problems, anxiety and mood fluctuations; and

WHEREAS, Postpartum depression (PPD) is becoming more well-known, and it affects 10 to 20 percent of new mothers; and

WHEREAS, Symptoms must last more than two weeks to be considered PPD and not just "baby blues"; and

WHEREAS, There are also more symptoms associated with PPD, such as feeling inadequate or guilty, feeling sad constantly, feeling suicidal, not attaching or bonding to the baby, overly worrying about the baby or not being interested at all in the baby; and

WHEREAS, Information obtained from the New York State Department of Health indicates that 10-20% of new mothers suffer from maternal depression, including periods of sadness, anxiety, fatigue and thoughts of death or suicide; and

WHEREAS, For more than 1 out of every 1,000 new mothers, the maternal depression they experience, also known as postpartum psychosis, can lead to hallucinations and mania; and

WHEREAS, Maternal depression is believed to have contributed to the deaths of three infants who were allegedly killed by their mothers in separate incidents that took place in New York City in the late summer and early fall of 2015; and

WHEREAS, It is imperative that there be greater awareness of this serious health condition, and more must be done to increase activity at the local, State and National levels; now, therefore, be it

RESOLVED, That this Legislative Body pause in its deliberations to memorialize Governor Andrew M. Cuomo to proclaim May 2016, as Maternal Depression Awareness Month in the State of New York; and be it further

RESOLVED, That a copy of this Resolution, suitably engrossed, be transmitted to The Honorable Andrew M. Cuomo, Governor of the State of New York.
